

DARTMOUTH COLLEGE

∴ Department of Zoology ∴
HANOVER · NEW HAMPSHIRE

19 June 1959

Dear Dean Jensen,

Thank you very much for the notification of my promotion to Research Associate with the rank of assistant professor. I am very glad to have risen at last above the rank of instructor.

Thank you also for getting me another increase in salary. It gives me a feeling of financial security that I have not had for years.

I had a rather heavy dose of teaching last term, with both Technic and Algae, but I enjoyed it very much. I shall hope to be permitted to teach these courses in coming years, though preferably not simultaneously.

This summer, except for a few days attending the International Botanical Congress at Montreal, I expect to be in Hanover, working on my Alaskan algae.

Thank you again for the encouragement.

Sincerely,

Hannah Croasdale
